

EXECUTIVE BRIEF

OnBase Clinical Content Strategy

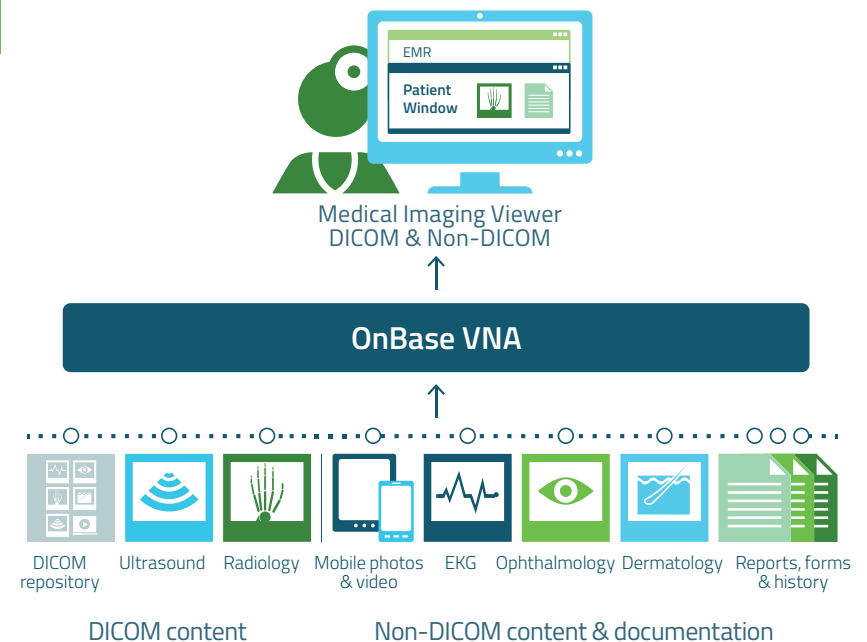

Strategically manage clinical content across its life cycle while providing clinicians and staff across the enterprise a single point of access for clinical content. Ensuring the right providers have the right information, at the right time and in the right context helps empower the right decisions for more effective patient care.

HIGHLIGHTS:

- Creates one secure, centralized repository for clinical content across the enterprise
- Provides an easy and efficient view of more comprehensive patient information
- Facilitates more informed decisions

IMPACT:

- Brings together all unstructured clinical content, eliminating information silos
- Offers access to DICOM and non-DICOM content alongside other patient information within the EMR
- Supports continuity of care
